The Black Hawk Soil and Water Conservation District is partnering with the Iowa Department of Natural Resources to hold a water quality “snapshot” to gather data from four branches of Dry Run Creek (DRC).

- Volunteers will be trained on proper water quality data collection methods and assigned testing locations along DRC.
- **No experience needed!**
- Groups (small or large) are welcome.
- The event will take place rain or shine!
- Knowing the health of DRC allows us to more accurately treat sources of pollutants and work toward a measureable impact on improving water quality.
- For more information or to RSVP, please contact Ashley Kittle (319) 296-3262 or ashley.kittle@ia.nacdnet.net
