This section pertains to all sheds, shelters, gazebos, or other detached accessory structures

- 1) 18 feet behind the front of the house.
- 2) Corner lot - "in-line" with the house on the longer street side.
- 3) 8-foot wall-to-wall separation between house and detached accessory structure.

- 1) 18 feet behind the front of the house.
- 2) Less than 600 ft² - 2 feet from the side and rear lot line.
- 3) 8-foot wall-to-wall separation between house and detached accessory structure.

- 1) 18 feet behind the front of the house.
- 2) Greater than 600 ft² - 10% of the lot width from the side and 10 feet from the rear lot line.
- 3) 8-foot wall-to-wall separation between house and detached accessory structure.
- 4) Exterior materials of the detached accessory structure must match the house.

- 1) Even with the front of the house.
- 2) Setback 10% of the lot width from the side.
- 3) 8-foot wall-to-wall separation between house and detached accessory structure.

- Notes:
- Size of detached accessory structure or a combination of detached accessory structures is determined by lot width.
 - Lot width times required rear yard time 45% (LW x 30x 0.45). Example: Lot with 66 feet = 891 ft² (66 x 30 x 0.45 = 891).
 - Maximum size for detached accessory structures is based on the following:
 - 1 acre or less = 1,024 ft²
 - 1 to 2 acres = 1,200 ft²
 - 2 to 3 acres = 1,400 ft²
 - 3 to 5 acres = 1,600 ft²
 - 5 to 8 acres = 3,000 ft²
 - 8 to 11 acres = 4,000 ft²
 - 11 to 20 acres = 5,000 ft²
 - Land use accessory structure permit is required for a \$25.00 fee prior to construction
 - All detached accessory structures under 120 square feet in area must abide by the above criteria and requires a zoning land use permit.
 - All detached accessory structures over 120 square feet in area require a building permit. Check with Building Inspections on the footing detail requirements.
 - **All detached accessory structures must be located outside all platted stormwater drainage easements.**
