NOTES TO USERS

- Preliminary Flood Insurance Rate Map (FIRM) includes historic versions, the current map date for each FIRM panel, how to order products, or the availability of certain products.

- For information and questions about this Flood Insurance Rate Map (FIRM), available products associated with the National Flood Insurance Program (NFIP) in general, please call the FEMA Map Information eXchange at 1-877-336-2627 or visit the FEMA Flood Map Service Center website at https://msc.fema.gov.

- Communities annexing land on adjacent FIRM panels must obtain a current copy of the adjacent panel as well as digital versions of this map. Many of these products can be ordered or obtained directly from the website.

- Available products may include previously issued Letters of Map Change, a Flood Insurance Study Report, and/or FEMA-MAP (1-877-336-2627). The FIRM information, including historic versions, the current map date for each FIRM panel, how to order products, or the availability of certain products.

- The information depicted on this map and supporting features were derived from digital orthophotography collected by the Iowa Department of Natural Resources. This imagery was flown in 2010.

- For a detailed legend and index map for FIRM panel layout, see the Flood Insurance Study Report for the jurisdiction.

- Map data information is available at the FIRM information, including historic versions, the current map date for each FIRM panel, how to order products, or the availability of certain products.

- The Geological and Hydrographic Survey, Department of Natural Resources, has supplied the information and data that are shown on this FIRM.

- Base map information shown on this FIRM was derived from digital orthophotography collected by the Iowa Department of Natural Resources. This imagery was flown in 2010.

- To determine if flood insurance is available in this community, contact your Insurance agent or call the National Flood Insurance Program (NFIP) at 1-800-638-6620.

- Water bodies such as basins, creeks, and drainage ditches have been shown on this map. Basins were hydraulically modeled using the Water Body Model, and drainage ditches and culverts were georeferenced using DEMs. Drainage ditches were depicted using DEMs, and culverts were depicted using DEMs and hydrography data.

- The information shown on this FIRM may be used for planning and development purposes. This information is not intended to be used for the identification of floodplains.
